ARTISTIC STATEMENT

As a visionary artist, I explore the hidden dimensions of consciousness, the structure of the universe, and higher-dimensional beings. Each of my works opens a window to a world beyond material reality, guiding viewers toward a deeper connection with the spiritual and the inner self.

With my expanded sensory awareness, I am able to see and experience energy. I translate these complex, multidimensional structures into simple mathematical geometries, bringing them to life on canvas as symbols.

It is essential to engage with these modern icons through meditation and silence to experience one's own transcendent space. Similar to my work as a holistic doctor, my art is intended to make the divine and healing tangible. Sacred or visionary art goes beyond pure aesthetic expression, acting as a bridge between the physical and spiritual realms.

Since 2022, I have developed meditation and transformation paintings for public and private spaces. Each painting is an immersive installation with a guided audio meditation, inviting viewers to connect with the energy of the symbol and enter an expanded experience.

Alongside my studio practice, I initiate participatory public art formats such as *Heart Circle - a temporary temple*, a mobile art project in public space.

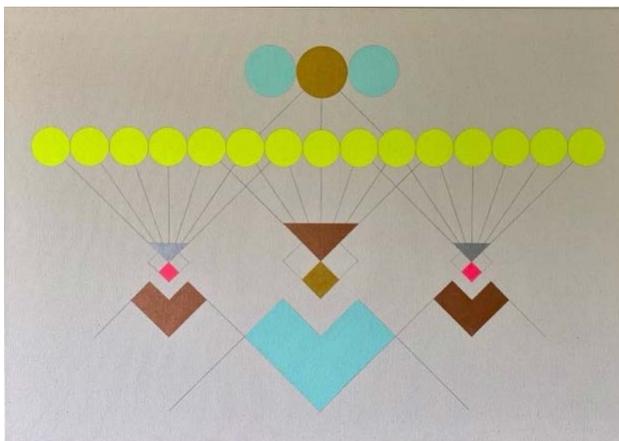

Each circle unfolds as a temporary temple — a living artwork of connection and compassion. People are invited to enter spontaneously. Public space becomes a shared field of encounter, collective awareness, spirituality, and peace.

I continue to develop this format across European cities on a non-profit, voluntary basis, in collaboration with local artists and communities.
